👋 Happy to meet you!

I'm Stefano, Senior Engineer with **8+ years of experience** in Javascript and Typescript, specialised in both **Frontend and Backend development**. With a **background in UI/UX design**, I built a strong eye for details and seamless collaboration with design and product teams. I've worked across diverse industries like fintech, e-commerce, travel and cybersecurity (B2B/B2C), to **deliver innovative and impactful solutions**. I'm growth-focused, always striving to make a meaningful difference. When I'm not coding, I'm either experimenting with music, diving into AI or gaming. Passionate about building **accessible, user-centric applications**, I'm also **dedicated to mentoring and fostering growth** within the tech community.

🚀 Experience

Bitpanda — Senior Engineer 📅 Jan 2024 - present / Barcelona

React PandaCSS Design System Storybook Next Nx Jest Playwright

- Developed scalable, white-label design system from scratch, ensuring cross-project maintainability and consumer time-to-deliver reduction of 50%
- Built, maintained and documented React components with PandaCSS and Styled Components, ensuring consistency and WCAG AA accessibility
- Implemented Next broker app, Storybook, and optimised Gitlab CI/CD pipelines to streamline workflows and delivered a scalable solution
- Collaborated with designers to ensure the design system follows best practices in accessibility and composability, speeding up client acquisition
- Facilitated onboarding for senior and junior/mid-level engineers into the new codebase, ensuring guidance and effective knowledge transfer
- Optimized components development with Nx, Jest, and Playwright, enhancing tech choices for robust testing and maintainability (~96% coverage)

Airalo — Senior Frontend Engineer 📅 Jul 2023 - Jan 2024 / Barcelona

Nuxt Vue Jest Playwright Tailwind

- Developed Partners Portal as white-label solution for B2B clients (~17 new key partners in beta)
- Migrated key feature from Vue2 components to Vue3, developed new features and extensively tested them
- Contributed to app architecture decisions based on clients feedbacks and collaborated with backend shaping solutions from the frontend side
- Extensively documented the codebase, filling the gaps to improve project understanding and future scalability
- Collaborated with designers on wireframing and development strategies

Nord Security — Senior Frontend Engineer 📅 Mar 2022 - Jul 2023 / Berlin

Astro React Storyblok Design System Storybook Jest Cypress Cloudflare Workers Tailwind

- Built a static marketing page system with Astro aiming for 100 lighthouse score and contributing to the Astro community since its alpha release
- Integrated Storyblok CMS, WYSIWYG editor with React design system components, enabling marketing pages creation without development input
- Developed unit and e2e tests other than extensive documentation to ensure maintainability
- Leveraged A/B testing using Cloudflare Workers for improved analytics, localised campaigns and marketing research

Blacklane — Fullstack Engineer > Senior Javascript Engineer 📅 Nov 2019 - Mar 2022 / Berlin

React Next Storybook Design System Express Docker GraphQL Jest Playwright Elastic Redis

- Transitioned from mid-level fullstack engineer to Senior
- Developed booking funnel, transitioning from a Ruby monolith to microservices using Next and Apollo GraphQL
- Built React components for the design system with CSS modules and worked on GraphQL resolvers interfacing with legacy RESTful APIs
- Integrated real-time backend services using Redis and Elasticsearch
- Implemented and optimised CI/CD pipelines with CircleCI, Jest, Playwright and Vercel (time decrease of ~30%)

Bayes Esports Solutions — Fullstack Engineer 📅 Nov 2018 - Nov 2019 / Berlin

React Redux Gatsby Node MongoDB Jest

- Developed internal tools, data visualisation web app for esports betting and marketing landing pages
- Established frontend workflow and React design system
- Developed internal services with Node and using MongoDB

Nosto — Frontend Developer 📅 Sep 2016 - Sep 2018 / Berlin

HTML/CSS JS Apache Velocity Vue Sketch MJML

- Implemented Nosto SDK for e-commerce clients
- Designed and developed marketing and email campaigns based on clients needs
- Tech support for the custom integration in e-commerce websites

❤️ Mentoring

adpilist.org — Engineer Mentor 📅 Aug 2024 - present /

Mentoring Communication Leadership Career Development

- This role is a voluntary, fully remote opportunity, driven by my commitment to personal growth and making a positive impact in the tech community
- Mentoring engineers in career advancement, empowering them to identify and showcase their strengths, and refine technical and soft skills
- Fostering growth in technical expertise, with a focus on developing problem-solving abilities and innovative thinking
- Actively developing leadership skills to support my professional growth

🌟 Featured Project

Teesgenerator

Next Tailwind Typescript Stripe API Replicate AI Vercel

Personal project using AI to produce custom art for t-shirts and ship globally. Without generation fees and integrating third-party services, Teesgenerator provides a swift, engaging user experience. Timing and speed were vital for timely delivery, leveraging the emerging AI trend.
